Payment Schedule: The payment schedule shall be decided at the time of signing the work order and will be based on the deliverables with an initial payment at the time of signup.

3. User Story / Understanding

The Client wants to develop a similar app "Find me a mentor" with some unique features.

This app is a social platform for Mentors and Mentees to learn new skills, by helping each other. The mentors and mentees can take advantage of the messaging tool for efficient communication. In addition, the mentees and mentors can see each other posts and shared information. There is an organized news section is also built into the application.

Using this app, the user will be able to join many others who are looking for your skills and offering to teach you theirs.

Once you have signed up, you can begin searching for the perfect person for you and, after finding them, start messaging them right away to begin you are mentoring.

The following are the added features to the proposed application:

- a. Nearby mentor: This allows the mentees to find the mentors who are available in their nearby location and list them in the application
- b. Rating Based Mentor: The proposed application will list the mentors based on their rating and also the mentees are allowed to rate their mentors through this application
- c. Mentee Groups: By creating a mentee group each mentees are allowed to create the group among them and share or broad cast the messages in the particular group
